

## **Report on Street and Parking Lot Design Regarding Minimizing Impervious Cover**

This document is in response to Section 2.3.6b of the Town of Newbury General Permit for Stormwater Discharges effective July 1, 2018.

Anticipating this requirement the Newbury Planning Board reviewed and modified its subdivision rules and regulations, and its site plan review regulations, to assure the reduction of the required street width and parking space size requirements to the minimum size consistent with public safety. These requirements remain thus at this point in time.
