NOTES:
- PORTION OF SURVEY INFORMATION PROVIDED BY CAMMETT ENGINEERING, AMESBURY, MA
- EXISTING DUMPSTERS ARE PROPOSED TO BE RELOCATED TO ANOTHER AREA OF THE SITE (NOT SHOWN).
- SEE SHEET C4 FOR LANDSCAPE PLAN.
EROSION AND SEDIMENTATION CONTROLS, STORMWATER MANAGEMENT CONTROLS, SOLID WASTE CONTROLS AND SPILL PREVENTION CONTROLS.

5. JUTE MATTING ON ALL SLOPES WITH SURFACE GRADES EQUAL TO OR STEEPER THAN 3:1 SHALL BE STABILIZED WITH JUTE MATTING.

6. DURING THE CONSTRUCTION PROCESS WITH RESPONSIBILITIES IN ACCORDANCE WITH THE SWPPP.

7. SEDIMENT CONTROL MEASURES SHALL BE PROVIDED AROUND ALL EXISTING AND PROPOSED DRAINAGE STRUCTURES AS DETAILED ON THE DRAWINGS.

8. CHECK DAMS ARE TO BE PROVIDED ON TWO HUNDRED (200) FOOT SPACING WITHIN ALL DRAINAGE SWALES AND DITCHES AND AT UPSTREAM SIDES OF 0.25 INCH OR GREATER AND AT LEAST ONCE EVERY 14 DAYS DURING CONSTRUCTION TO INSURE THAT CHANNELS, DITCHES AND PIPES ARE CLEAR.

9. THE CONTRACTOR SHALL HAVE AT THE START OF SOIL DISTURBANCE AN ADEQUATE RESERVE OF SILT FENCE AND SILT SOCKS IN GOOD CONDITION AND THE POTENTIAL FOR ON-SITE EROSION HAS PASSED.

10. THE CONTRACTOR SHALL BE RESPONSIBLE FOR REMOVAL OF ALL SILTATION CONTROLS. THE CONTRACTOR SHALL NOT REMOVE ANY SILTATION SOCKS, SILT FENCE OR OTHER SILTATION CONTROLS SHALL BE MAINTAINED IN A SATISFACTORY CONDITION UNTIL CONSTRUCTION IS COMPLETED.

11. CONTRACTOR SHALL TEST THE DEWATERING WASTEWATER FOR CONTAMINANTS PRIOR TO DISCHARGING. THE CONTRACTOR IS RESPONSIBLE FOR ALL REMOVAL (TYP).

12. OF 0.25 INCH OR GREATER AND AT LEAST ONCE EVERY 14 DAYS DURING CONSTRUCTION TO INSURE THAT CHANNELS, DITCHES AND PIPES ARE CLEAR.

13. CONTRACTOR SHALL MAINTAIN A SUFFICIENT RESERVE OF VARIOUS EROSION CONTROL MATERIALS ONSITE AT ALL TIMES FOR EMERGENCY.

14. CONTRACTOR SHALL BE RESPONSIBLE FOR REMOVAL OF ALL STOCKPILE AREAS SHALL BE LOCATED WITHIN LIMIT OF WORK AND STABILIZED TO PREVENT EROSION.

15. SILT SOCKS, SILT FENCE OR OTHER SILTATION CONTROLS SHALL BE MAINTAINED IN A SATISFACTORY CONDITION UNTIL CONSTRUCTION IS COMPLETED.

16. ALL SEDIMENTATION AND EROSION DAMAGE CAUSED AS A RESULT OF THIS PROJECT TO ANY WETLAND RESOURCE AREAS OR IDENTIFIED WETLAND BUFFER ZONES BEYOND THE LIMIT OF WORK SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO REPAIR AND RESTORE AT NO COST TO THE CONTRACTOR. AS CONSTRUCTION PROGRESSES AND SEASONAL CONDITIONS DICTATE, MORE SILTATION CONTROL FACILITIES MAY BE REQUIRED. IT IS RECOMMENDED THAT THE CONTRACTOR ESTABLISH A SYSTEM TO PREVENT SILTATION OR POLLUTION OF ADJACENT PROPERTY, WETLANDS OR BUFFER ZONES. THE SYSTEMS SHOWN SHALL BE MINIMUM REQUIREMENTS AND A GUIDE FOR THE PLACEMENT OF THESE BARRIERS. OTHER MEASURES MAY BE WARRANTED BASED UPON SITE CONDITIONS. THE IMPLEMENTATION, MAINTENANCE, REPLACEMENT AND ADDITIONS TO THESE SYSTEMS SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.

17. CONTRACTOR SHALL TEST THE DEWATERING WASTEWATER FOR CONTAMINANTS PRIOR TO DISCHARGING. THE CONTRACTOR IS RESPONSIBLE FOR ALL REMOVAL (TYP).

18. THE CONTRACTOR SHALL DESIGNATE AN EROSION CONTROL INSPECTOR TO SERVE CONDITIONS. THE IMPLEMENTATION, MAINTENANCE, REPLACEMENT AND ADDITIONS TO THESE SYSTEMS SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.

19. THE CONTRACTOR SHALL TEST THE DEWATERING WASTEWATER FOR CONTAMINANTS PRIOR TO DISCHARGING. THE CONTRACTOR IS RESPONSIBLE FOR ALL REMOVAL (TYP).

20. REQUIRED SEDIMENTATION CONTROL FACILITIES MUST BE CONSTRUCTED, CLEARLY VISIBLE, AND IN OPERATION PRIOR TO CONSTRUCTION. UNLESS PRIOR TO THE COMMENCEMENT OF CONSTRUCTION ON THE SITE, THE OWNER SHALL DESIGNATE AN EROSION CONTROL INSPECTOR TO SERVE CONDITIONS. THE IMPLEMENTATION, MAINTENANCE, REPLACEMENT AND ADDITIONS TO THESE SYSTEMS SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.

21. CONTRACTOR SHALL TEST THE DEWATERING WASTEWATER FOR CONTAMINANTS PRIOR TO DISCHARGING. THE CONTRACTOR IS RESPONSIBLE FOR ALL REMOVAL (TYP).

22. SOIL EROSION AND SEDIMENTATION CONTROL MEASURES SHALL BE INSPECTED AND MAINTAINED ON A WEEKLY BASIS OR AFTER EACH STORM EVENT.

23. CHECK DAMS ARE TO BE PROVIDED ON TWO HUNDRED (200) FOOT SPACING WITHIN ALL DRAINAGE SWALES AND DITCHES AND AT UPSTREAM SIDES OF 0.25 INCH OR GREATER AND AT LEAST ONCE EVERY 14 DAYS DURING CONSTRUCTION TO INSURE THAT CHANNELS, DITCHES AND PIPES ARE CLEAR.

24. THE CONTRACTOR SHALL TEST THE DEWATERING WASTEWATER FOR CONTAMINANTS PRIOR TO DISCHARGING. THE CONTRACTOR IS RESPONSIBLE FOR ALL REMOVAL (TYP).

25. Siltation controls, including silt fence, silt sock, and other erosion control measures, shall be maintained in a good condition and will be removed from the construction site when no longer necessary. The contractor shall ensure that all siltation controls are properly disposed of in accordance with local regulations.

26. In accordance with local regulations, all temporary structures, including silt fences, silt socks, and erosion control measures, shall be removed immediately after the completion of construction activities or at the end of the construction season, whichever occurs first. The contractor shall notify the appropriate authorities of the removal of any temporary structures.

27. The contractor shall ensure that all siltation controls are properly disposed of in accordance with local regulations.

28. The contractor shall ensure that all existing trees are protected during the construction process and will be maintained in a good condition.

29. The contractor shall ensure that all existing wetland areas are protected during the construction process and will be maintained in a good condition.

30. The contractor shall ensure that all proposed wetland areas are protected during the construction process and will be maintained in a good condition.

31. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.

32. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.

33. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.

34. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.

35. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.

36. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.

37. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.

38. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.

39. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.

40. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.

41. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.

42. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.

43. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.

44. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.

45. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.

46. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.

47. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.

48. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.

49. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.

50. The contractor shall ensure that all existing and proposed wetland areas are protected during the construction process and will be maintained in a good condition.
**Site Details**

**Proposed Site Development Plans**

**C8**

---

**EVERGREEN TREE PLANTING**

- **Prune**:
  - Cut and remove as much burlap as possible, if non-biodegradable.
  - Cut and remove at least the first 2" of non-biodegradable rootball to expose the natural root system.
  - Prune only Diseased or broken branches. Retain healthy leader, when practical.
  - Leave only 1"-2" above finish grade.
  - Trim tree flare to remain 1"-2" above finish grade.
  - 2'-4" layer of mulch. Keep mulch 2" back from trunk.
  - Natural form of tree; do not trim leader, when practical.
  - Prune only in injured or broken branches. Retain healthy leader, when practical.
  - Leave only 1"-2" above finish grade.
  - Trim tree flare to remain 1"-2" above finish grade.

**BRUNETTE PLANTING**

- **Prune**:
  - Cut and remove as much burlap as possible, if non-biodegradable.
  - Cut and remove at least the first 2" of non-biodegradable rootball to expose the natural root system.
  - Prune only Diseased or broken branches. Retain healthy leader, when practical.
  - Leave only 1"-2" above finish grade.
  - Trim tree flare to remain 1"-2" above finish grade.
  - 2'-4" layer of mulch. Keep mulch 2" back from trunk.

**HORIZONTAL DRAINAGE**

- **Planting**:
  - Dock, gangway, and float
  - Drainage and water control
  - Placement and sizing of drains
  - Surfacing and paving

**GROUNDCOVER / ANNUAL / PERENNIAL PLANTING**

- **Planting**:
  - Placement and sizing of drains
  - Surfacing and paving
  - Placement and sizing of drains
  - Surfacing and paving

---

**Notes**:

- Review all planting for rootball size and species compatibility.
- Check for proper planting depth and soil conditions.
- Water newly planted trees weekly until established.
- Keep areas clean and free of debris.
- Monitor for pest and disease control.
- Keep trees pruned as necessary.

---

**Ground Cover / Annual / Perennial Planting**

- **Plants**:
  - Evergreen trees
  - Arborvitae
  - Leyland cypress
  - Arborvitae
  - Leyland cypress
  - Arborvitae
  - Leyland cypress
